

WHITEPAPER

ABSTRACT

Cheetah is an innovative gaming meme project that aims to revolutionize the gaming industry by introducing a decentralized economy by leveraging blockchain technology and smart contracts, Cheetah enables seamless and secure transactions within gaming ecosystems, empowering players, developers and investors. This whitepaper provides an in depth analysis of the Cheetah project, its underlying technology and its potential impact on the gaming industry.

INTRODUCTION

The gaming industry has experienced tremendous growth over the years, with millions of players engaging in various digital gaming experiences. However, the industry has been plagued by challenges such as limited ownership and control over in-game assets, lack of transparency and restricted monetization opportunities for developers. These issues have created a demand for innovative solutions that can enhance the gaming experience for all stakeholders.

PIONEERING CHANGE WITH CHEETAH

Cheetah is Starting as a gaming meme coin and definitely going to be one of the best utility coins in the space. Our mission is to propel the crypto landscape forward by embracing the untamed energy of the cheetah. Much like the world's fastest land animal, we're driven by speed, precision, and the courage to break barriers.

Cheetah is not just another cryptocurrency – Its a movement, a vision, and a testament to the boundless possibilities of innovation. Founded with a spirit of relentless ambition, we've set out on a journey to redefine the future of finance. In a world where uncertainty has often cast shadows, we emerge as a beacon of hope and a bastion of trust in the realm of cryptocurrency. We've arrived with a singular purpose: to restore faith in the immense potential of this evolving landscape.

INTRODUCING CHEETAH

CHEETAH is a cutting-edge cryptocurrency project designed to integrate blockchain technology into the gaming industry.

The PLAY2EARN Adventure is an exciting crypto game that combines the elements of traditional gaming with blockchain technology and the play-to-earn concept. In this immersive virtual world, players embark on thrilling adventures as they control their own unique Cheetah character, traverse stunning landscapes, and collect valuable in-game assets that can be traded or sold for real-world cryptocurrency. It offers a comprehensive ecosystem that enables players to own, trade and monetize their in-game assets securely. Additionally Cheetah will provide developers with new funding opportunities and a platform to engage with the community by leveraging the power of decentralized Finance(Defi) and blockchain technology, Cheetah aim to revolutionize the gaming experience for players and developers alike.

WHITEPAPER

PLAY TO EARN MECHANISM

Early players will be able to mine Cheetah \$cht before launch which is a way of giving back to the community. The more coin they earn, the more \$cht token they mine. What sets “Cheetah” apart is its play-to-earn mechanism, which enables players to earn valuable rewards and cryptocurrency while playing the game. Through their active participation, players can accumulate in-game assets, such as unique character skins, weapons, power-ups, and rare items. These assets are stored on the blockchain, ensuring their scarcity and authenticity.

NFT & NFT Marketplace

There will be an NFT collection which will offer holders exclusive access to all ecosystem utilities including revenue sharing. Also, we will design an NFT marketplace where users can trade our NFTs and other NFT collections.

STAKING AND FARMING

All holders of \$Cht and NFT holders will have the opportunity to earn passively through our staking platform as well as farm \$cht and other

CHEETAH UNDERLYING TECHNOLOGY

Cheetah utilizes blockchain technology to create a transparent and immutable ledger of transactions by leveraging a distributed network of nodes. The blockchain ensures that all transactions are verified and recorded in a secure and tamper-proof manner. This transparency and security provide players and developers with increased trust and confidence in the gaming ecosystem.

SMART CONTRACTS

Smart contracts are self-executing contracts with predefined rules encoded on the blockchain. Cheetah employs smart contracts to automate various processes within the gaming ecosystem such as asset ownership transfers, in-game rewards distribution and revenue sharing. Smart contracts eliminate the need for intermediaries, reducing costs and enhancing the efficiency of transactions.

CONSENSUS MECHANISMS

Cheetah adopts a consensus mechanism to validate and verify transactions on its blockchain Proof-of-Stake (PoS) or Proof-of-Authority (PoA) algorithms. May be utilized to achieve consensus, ensuring the security and integrity of the network. These consensus mechanisms contribute to the scalability and efficiency of the Cheetah ecosystem.

KEY COMPONENTS

Cheetah \$cht is the native token of the cheetah ecosystem. It serves as a medium of exchange, enabling seamless transactions within the gaming ecosystem. Cheetah \$cht can be used to purchase in-game items and participate in tournament.
